

Street Lighting Supplies Ltd

Product Datasheet

These external slipover column reducers are designed to convert an existing pole, post or column top spigot to take a new lantern or bracket. The larger end slips over the existing spigot to produce the new required shaft diameter.

They are Galvanised to BS EN ISO 1461:2009 and designed to reduce columns and sign posts to accept lanterns or brackets. They are supplied fitted with eight M10 stainless steel socket screws and can be finished to most paint specifications upon request.

Product Number	Column Diameter	Required Diameter
6260	76mm	60mm
6261	89mm	60mm
6262	101mm	60mm
6263	114mm	60mm
6264	127mm	60mm
6265	140mm	60mm
6266	168mm	60mm
6270	89mm	76mm
6271	101mm	76mm
6373	114mm	76mm
6374	127mm	76mm
6275	140mm	76mm
6276	168mm	76mm
